

# Next Generation LCD Display Programmable Timer

## Product Description

### Cost Efficient Cooking

With the National Controls next generation TNC-T9026-010 programmable cooking timer, inefficient frying or cooking operations will become a thing of the past. Not only is this timer versatile in its ability to cook any food temperature, but it is the only timer on the market that actually shows kitchen workers what to do. The new easy to read graphical function/time display will give you consistent cooking quality, while also making training a simple task. Together with its wide range of cooking times, in-the-field programming, the TNC-T9026-010 timer gives the restaurant owner maximum flexibility, reduced operating cost, and easy operation.

### Cook Times Field Programmable

Cook times can be programmed very easily in the field. This allows the customer to adjust times for best product taste and appearance. All standard times are loaded before leaving the factory. Should new products need to be added in the future, menu information can be easily updated using a USB flash drive.

## Model TNC-T9026-010 Features
